

UNIVERSAL RACK MOUNT FIBRE OPTICAL ENCLOSURE

FibreBox offers the universal 1RU Rack Mount Fibre Optical Enclosure with 4 slots FAPs. This provides a comprehensive line of fibre distribution within the one enclosure which is a flexible and modular system for managing fibre terminations, connections, and patching in all applications. FibreBox provides a durability enclosure as a perfect solution for the termination and distribution of Fibre for the professional.

FBFT1RU-TRAY

FBFT1RU

This enclosure is available in a host of configurations and connector variants. A broad range of adapter plates, versatile cassette mounting and excellent cable management internally & for entering cables, all combine to offer a tailored solution for your needs. This enclosure employs a modular approach ranging from MTP cassettes, preterminated cables to splicing fibre. Coupled with the unit's compact size, the Universal Rack enclosure is suited to a range of installation requirements making it unique to the market.

Features & Benefits

- Rugged powder coated aluminium and steel construction ensures product durability
- Screen printed panels and enclosure facia offer excellent port labelling & identification
- Range of panel and faceplate options to suit a broad variety of fibre types and adapter styles
- Compact size offers excellent versatility even in shallow cabinets and racks
- Shallow enclosure depth suitable for shallow racks to tray internals.

Applications

- Fusion splicing of loose tube or tight buffer cables
- Direct termination of tight buffer cables
- Pre-terminated loose tube or riser cables
- Suitable for shallow racks where in-rack cable movement is problematic.
